Our next generation stand-up pouch system continues the CMD tradition of **high quality** and **operational innovation**, with features that enhance profitability through time and money-saving efficiency:

EASIER TO USE,
EASIER TO TRAIN

QUICK,
REPEATABLE
CHANGEOVERS

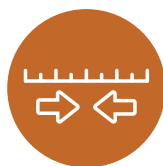

ROBUST
PRECISION

FASTER
MAINTENANCE

► What's New

You told us what you were looking for from your pouch machine, and we've built those features and value into our improved design - which also includes a new, attractive price!

OPERATION

Process and Profitability

- CMD customers report, on average, 40% faster changeovers than on competitive machines.
- Light guarding ensures safety while removing mechanical guarding so changeovers are completed faster than ever.
- CMD's patented Intelligent Sealing Technology - now also on longitudinal sealers - reduces scrap, and provides the most repeatable process in the industry.
- A programmable 'bed-clear' feature ensures you only pack good pouches after a start-up, and that the start-up scrap is kept to a minimum.
- Extended-length conveyor provides extra time for pack-off.
- Reduced maintenance touchpoints ensure maximum up-time.
- Very quick guillotine blade changes enhance overall productivity.
- New Beckhoff controls platform offers the processing speed and communication reliability of the Ether-Cat network protocol.

Products

- The 760-SUP provides the largest product size range in its class.
- Easily run today's sustainable materials with simple touch screen recipes.
