PRIMERS FOR UV DIGITAL APPLICATIONS:

OPUV-858:

Clear non-yellowing formulation for Mark Andy, Domino, Durst, and Screen Digital applications.

OPUV-868:

Lower cost version of the OPUV-858, both perform very well in all these applications.

UV LAMINATION ADHESIVE:

OPUV-859:

UV Lamination Adhesive for UV Digital applications. ONLY one on the market when printing all the way to the edge of the label. The ONLY one! Typically applied at 3.8-5 BCM however, performs very well when applied at a 1.8 BCM.

OPAUV-837:

Tried and True "sticky" UV Lamination Adhesive. Normal Flexographic applications. Less expensive than self-wound lamination and NO NOISE. Typically applied at 3.5-5 BCM.

OPAUV-920:

Low odor, Low Migration, UV & LED Lamination Adhesive for Flexible Packaging.
